SUMMARY

AI Engineer with 3+ years of experience building production-grade LLM applications, RAG pipelines, and AI-driven automation systems. Proven experience in designing scalable backend architectures and integrating AI into real-world fintech and business systems. Strong focus on applied AI, system design, and delivering reliable, high-impact intelligent products.

PROJECTS

NarrativeAuditor — LLM-based Script Evaluation System

<https://github.com/gitgurudev/NarrativeAuditor.git> 🔗

- Designed and implemented an **LLM-as-a-Judge architecture** with 4 independent evaluators (Clarity, Creativity, Engagement, Coherence)
- Reduced manual script evaluation effort by approx 35%.
- Built a **multi-stage reasoning pipeline (reason → summarize → score)** for consistent and reliable evaluation
- Processed 136-page PDFs with 4-evaluator parallel pipeline, reducing eval time by ~60%
- Supports multi-LLM evaluation → OpenAI, Mixtral, etc.
- Developed advanced analysis modules:
 - Character consistency tracking
 - Plot gap detection with severity ranking
 - Tone arc analysis
- AI-powered scene rewriting
- Architected a **model-agnostic system**, enabling evaluation across multiple LLM providers
- Built fully **client-side (no backend)** ensuring privacy-first processing

AstroTalks — AI-powered Astrology Chat Application

<https://github.com/gitgurudev/AstroTalks.git> 🔗

- Built a **full-stack GenAI application** simulating a Vedic astrologer with controlled persona and structured conversational flow
- Ensured persona consistency across sessions using prompt engineering.
- Designed **prompt architecture for persona consistency**, ensuring stable tone, response format, and domain alignment across sessions

- Implemented **context-aware response generation** using user inputs (name, DOB → Sun sign, Nakshatra mapping)
- Developed **conversation persistence layer** using MongoDB for maintaining chat history and continuity
- Built end-to-end system (**React + Node.js + API + DB integration**) handling real-time interactions for 100+ concurrent sessions.
- Resolved integration challenges including API reliability, DNS issues, and response consistency

Tech Stack: React (Vite), Node.js (Express), MongoDB Atlas, OpenRouter (Mixtral 8x7B)

EXPERIENCE

Grafotics LTD, Senior Software Engineer Team Lead

12/2022 – Present

FoodFox — Designed and built a scalable cloud-native food delivery system (multi-panel architecture)

VIRAR (E), MUMBAI

- Designed and built a scalable, cloud-native multi-panel food delivery system with complete system architecture and data flow on AWS
- Developed role-based interfaces for Admin, Restaurant, Cash Counter, and Customers with secure workflows and access control
- Built full-stack features using React, TypeScript, Tailwind CSS, and Supabase enabling rapid product iteration
- Integrated Razorpay payment gateway, improved payment success rate by ~15%, reducing checkout drop-off
- Implemented Google Maps Platform for real-time address selection, delivery zone mapping, and order tracking
- Engineered AI-driven UI generation using optimized prompts, reduced frontend development time by ~40% using AI-driven UI generation

Tech Stack: React, TypeScript, Tailwind CSS, Supabase, AWS, Razorpay, Google Maps API, Google OAuth, Lovable AI

Atlantaa — Real Estate & Construction CRM

- Developed custom CRM modules for marketing campaigns, lead capture, pipeline tracking, and conversion analytics
- Built inventory management system with live unit availability, booking workflows, and project tracking
- Implemented KYC verification, role-based access control, and multi-user authentication system
- Automated workflows using cron jobs for financial calculations and scheduled operations
- Built payroll modules, communication workflows, and real-time dashboards for business insights

Tech Stack: PHP, SuiteCRM, MySQL, JavaScript, Cron Jobs, KYC APIs

CreditMantra — Fintech Product Development

Payment & KYC

- Integrated CCAvenue payment gateway with optimized billing flow, reducing payment drop-offs by ~25%

- Implemented PAN/Aadhaar KYC verification with real-time validation and CRM synchronization
- Designed secure payment architecture ensuring data integrity across gateway transactions

AI Credit Intelligence

- Built LLaMA 3-powered Credit Report Analyzer parsing CRIF & CIBIL PDFs, analyzing 5+ credit factors per report
- Developed PDF parsing pipeline for extracting structured data from complex bureau reports
- Engineered credit score impact analysis system with factor-level insights (utilization, history, mix, inquiries)
- Created personalized credit improvement roadmap with actionable recommendations
- Implemented one-click dispute system with automated email escalation

Automation & Content

- Built n8n workflows for automated SEO content generation and publishing
- Developed lead nurturing pipelines integrating CRM, SMS, and email systems
- Designed multi-step user journey (OTP → billing → payment → CRM sync)
- Implemented subscription tracking, payment automation, and internal dashboards

CRM & Lead Management

- Developed custom SuiteCRM API modules for OTP-based lead capture, phone lookup, KYC status checks, and consent management
- Built multi-step lead journey — OTP verification → billing details → payment gateway — with full CRM account creation
- Configured subscription tracking, payment status automation, and role-based navigation for multi-user internal team

Tech Stack: PHP MERN Stack SuiteCRM MySQL JavaScript n8n CCAvenue API OpenRouter / LLaMA 3 PHPMailer 2Factor SMS API CRIF High Mark API Timble Glance KYC SVG CSS3

SRFC (Shree Ram Finance Company) — Loan Management System & Fintech Integrations

- Developed Loan Management System (LMS) with end-to-end loan lifecycle handling and microservices-based architecture
- Integrated identity verification and KYC systems including Aadhaar, PAN validation workflows
- Built financial data integrations for bank statement fetching via Finvu APIs
- Integrated credit bureau systems including Equifax, CIBIL, and CRIF for real-time credit score and report retrieval
- Designed automation pipelines for loan processing, verification, and decision workflows
- Implemented scalable microservices for handling high-volume financial data and third-party integrations

Tech Stack: PHP, Node.js, React, MySQL, SuiteCRM, n8n, LLaMA 3, CCAvenue API, KYC APIs

Spine Technologies, IMPLEMENTATION ENGINEER

05/2022 – 09/2022

Implemented and configured enterprise software solutions for financial clients. Handled client onboarding, integration testing, and post-deployment support.

NUCSOFT LTD, APPLICATION SUPPORT ENGINEER

01/2022 – 04/2022

- Client TATA AIG

 SKILLS

Languages

Python, JavaScript, PHP, Dart (Flutter)

AI/Automation

LLM integration, RAG pipelines, Prompt engineering, LLaMA 3, OpenRouter, n8n, LangChain

Databases

MySQL , MongoDB

APIs & Integrations

CIBIL , Equifax , Authbridge , FINVU , Google APIs , Meta , LLaMA , Razorpay , CCAvenue , Cashfree

Cloud & DevOps

AWS, GCP, Docker, CI/CD pipelines

Backend & APIs

Node , CMS , REST APIs , Microservices

 EDUCATION

MSc, IT, MSc IT, Patkar Varde College, Goregaon

2023

(Completed)

Bsc.IT, IT, Viva College

2020

- 57.67%
- GPA: 6.07
