SUMMARY

AI Engineer with 3+ years of experience building production-grade LLM applications, RAG pipelines, and AI-driven automation systems. Proven experience in designing scalable backend architectures and integrating AI into real-world fintech and business systems. Strong focus on applied AI, system design, and delivering reliable, high-impact intelligent products.

Projects

NarrativeAuditor — LLM-based Script Evaluation System

<https://github.com/gitgurudev/NarrativeAuditor.git> 

- Built LLM-as-a-Judge system with 4 evaluators (Clarity, Creativity, Engagement, Coherence)
- Reduced manual evaluation effort by ~35% and processing time by ~60%
- Designed multi-stage pipeline (reason → summarize → score) for consistent outputs
- Enabled multi-LLM support (OpenAI, Mixtral) with model-agnostic architecture
- Added advanced analysis: plot gap detection, character consistency, tone analysis, scene rewriting
- Privacy-first: fully client-side processing (no backend)

AstroTalks — AI-powered Astrology Chat Application

<https://github.com/gitgurudev/AstroTalks.git> 

- Developed full-stack GenAI app simulating Vedic astrologer with controlled persona
- Ensured response consistency using structured prompt engineering
- Built context-aware responses (DOB → Sun sign, Nakshatra mapping)
- Implemented chat persistence using MongoDB
- Handled 100+ concurrent users with real-time system (React + Node.js)

EXPERIENCE

AI Engineer

Viliso Technologies Private Limited

06/2026 – Present

Mumbai

- Developing AI-powered applications using Python, Large Language Models (LLMs), and Generative AI technologies.
- Designing and implementing Retrieval-Augmented Generation (RAG) pipelines with vector databases for intelligent document retrieval.
- Building REST APIs and scalable backend services using FastAPI.
- Integrating LLM APIs and optimizing prompt engineering for domain-specific AI solutions.
- Developing AI workflows using LangChain and LangGraph for automation and intelligent decision-making.
- Collaborating with cross-functional teams to design, test, and deploy production-ready AI solutions.
- Improving application performance, response quality, and reliability through evaluation and optimization.

FoodFox — Designed and built a scalable cloud-native food delivery system (multi-panel architecture)

- Designed and built a scalable, cloud-native multi-panel food delivery system with complete system architecture and data flow on AWS
- Developed role-based interfaces for Admin, Restaurant, Cash Counter, and Customers with secure workflows and access control
- Built full-stack features using React, TypeScript, Tailwind CSS, and Supabase enabling rapid product iteration
- Integrated Razorpay payment gateway, improved payment success rate by ~15%, reducing checkout drop-off
- Implemented Google Maps Platform for real-time address selection, delivery zone mapping, and order tracking
- Engineered AI-driven UI generation using optimized prompts, reduced frontend development time by ~40% using AI-driven UI generation

Tech Stack: React, CSS, AWS, Razorpay, Google Maps API, Google OAuth, Lovable AI

Atlantaa — Real Estate & Construction CRM

- Developed custom CRM modules for marketing campaigns, lead capture, pipeline tracking, and conversion analytics
- Built inventory management system with live unit availability, booking workflows, and project tracking
- Implemented KYC verification, role-based access control, and multi-user authentication system
- Automated workflows using cron jobs for financial calculations and scheduled operations
- Built payroll modules, communication workflows, and real-time dashboards for business insights

Tech Stack: PHP, SuiteCRM, JavaScript, Cron Jobs, KYC APIs

CreditMantra — Fintech Product Development**Payment & KYC**

- Integrated CCAvenue payment gateway with optimized billing flow, reducing payment drop-offs by ~25%
- Implemented PAN/Aadhaar KYC verification with real-time validation and CRM synchronization
- Designed secure payment architecture ensuring data integrity across gateway transactions

AI Credit Intelligence

- Built LLaMA 3-powered Credit Report Analyzer parsing CRIF & CIBIL PDFs, analyzing 5+ credit factors per report
- Developed PDF parsing pipeline for extracting structured data from complex bureau reports
- Engineered credit score impact analysis system with factor-level insights (utilization, history, mix, inquiries)
- Created personalized credit improvement roadmap with actionable recommendations
- Implemented one-click dispute system with automated email escalation

Automation & Content

- Built n8n workflows for automated SEO content generation and publishing
- Developed lead nurturing pipelines integrating CRM, SMS, and email systems
- Designed multi-step user journey (OTP → billing → payment → CRM sync)
- Implemented subscription tracking, payment automation, and internal dashboards

CRM & Lead Management

- Developed custom SuiteCRM API modules for OTP-based lead capture, phone lookup, KYC status checks, and consent management
- Built multi-step lead journey — OTP verification → billing details → payment gateway — with full CRM account creation
- Configured subscription tracking, payment status automation, and role-based navigation for multi-user internal team

Tech Stack: PHP MERN Stack SuiteCRM, JavaScript, n8n CCAvenue, OpenRouter / LLaMA 3, PHPMailer, 2Factor SMS API, CRIF High Mark API, Timble Glance KYC SVG CSS3

SRFC (Shree Ram Finance Company) — Loan Management System & Fintech Integrations

- Developed Loan Management System (LMS) with end-to-end loan lifecycle handling and microservices-based architecture
- Integrated identity verification and KYC systems including Aadhaar, PAN validation workflows
- Built financial data integrations for bank statement fetching via Finvu APIs
- Integrated credit bureau systems including Equifax, CIBIL, and CRIF for real-time credit score and report retrieval
- Designed automation pipelines for loan processing, verification, and decision workflows
- Implemented scalable microservices for handling high-volume financial data and third-party integrations

Tech Stack: PHP, Node.js, React, MySQL, SuiteCRM, n8n, LLaMA 3, CCAvenue API, KYC APIs

IMPLEMENTATION ENGINEER

05/2022 – 09/2022

Spine Technologies
Implemented and configured enterprise software solutions for financial clients. Handled client onboarding, integration testing, and post-deployment support.

APPLICATION SUPPORT ENGINEER

01/2022 – 04/2022

NUCSOFT LTD
• Client TATA AIG

 EDUCATION

MSc, IT

2020 – 2022

MSc IT, Patkar Varde College, Goregaon
(Completed)

Bsc.IT, IT

2020

Viva College
• 57.67%
• GPA: 6.07

 SKILLS

Languages

Python, JavaScript, PHP, Dart (Flutter)

AI/GEN AI

LLM Integration, RAG Pipelines, Prompt Engineering, LLaMA 3, OpenRouter, LangChain, FAISS

ML

PyTorch, Scikit-learn, TensorFlow

Databases

MySQL, MongoDB, BigQuery

APIs & Integrations

CIBIL , Equifax , Authbridge , FINVU , Google APIs , Meta , LLaMA , Razorpay , CCAvenue , Cashfree

Automation

n8n, Google Apps Script

Cloud & DevOps

AWS, GCP, Docker, CI/CD pipelines

Backend & APIs

Node , CMS , REST APIs , Microservices

 LANGUAGES

English

Marathi

Hindi

Intermediate

Certificates

GCP ACE — Earned the Associate Cloud Engineer certification, demonstrating hands-on skills in deploying, managing, and monitoring applications on Google Cloud. Familiar with core GCP services like Compute Engine, Cloud Storage, IAM, and basic networking, along with using the Google Cloud Console and CLI for day-to-day operations.
